POSITION · FAMILY · TYPE

Guitar Numeric Fingering System

Chords / Scales α / Arpeggios β

One name records a position and a shape.

Seven families connect movable patterns.

C1 D2 E3 F4 G5 A6 B7

651 entries · 13,701 diagrams · 2,323 pages

Complete reference · All valid positions for 20 / 24 frets

Revised: 2026-10-23

Edition details

Title: Guitar Numeric Fingering System

Author: Eaden Xu

Revised: 2026-10-23

Edition: Complete Fretboard Reference

Instrument: six-string guitar, standard tuning E A D G B E

Charts and indexes generated from this edition’s unified registry.

Reading and use

The numeric names are conventions for memory, lookup and movement. Geometric transposition in the seven families uses the guitar’s established semitone relationships. This book does not claim the first discovery of tuning, movable shapes or modes.

Diagrams are generated from actual string positions and formulas. Source links appear at the end; rights in those sources remain with their respective owners. Numeric names, formulas and reference ranges follow this edition’s unified registry.

Use the book with the website

Every valid reference fret for all 651 entries is printed within a 24-fret neck: 13,701 diagrams. The 20-fret range and 24-fret extension are marked. Each branch starts on a fresh page. Contents, bookmarks, “Contents” and “Family index” links are clickable. The website queries the same data interactively.

Author’s preface · How the system began

← Edition and use

At first, I simply wanted a freer, more direct way to remember guitar patterns. Faced with so many chords and fretboard positions, I wanted every pattern to have a clear name and its movement across the frets to follow a common rule, so that each position diagram would not have to be learned as an entirely new piece of information.

I wondered: if the basic C, D, E, F, G, A, and B shapes can be moved as a whole and used at different frets, why not organize and remember them directly as “fret number + pattern number”? That thought was the beginning of this system. I assigned the seven basic shapes to seven teaching families, used the first number for the reference fret, and grouped related variants into branches. Later, α distinguished scales and β distinguished arpeggios, gradually connecting names, diagrams, positions, and the sounds actually produced.

After the system had largely taken shape, further research and checking led me to CAGED and to lessons and diagrams by Jens Larsen and others. I realized that movable shapes, connections across the fretboard, and the associated scale and arpeggio relationships had already been explored and shared. This book should openly acknowledge those precedents and distinguish an independent process of exploration from the first discovery in history.

Even so, I believe this numeric naming method retains a distinctive logical value and beauty. By ordering positions, families, and variants explicitly, it makes complex diagrams easier to remember, find, and expand through consistent rules. The simplicity I seek means giving every part of a number a definite meaning and connecting seemingly vast material through a few rules. Complete clarity is the design goal I set for this system.

This method works alongside the existing C, D, E, F, G, A, B note names and chord system. Numeric names help you remember where to play and which pattern to use; standard note and chord names continue to describe what sounds. I hope to turn position diagrams that are difficult to memorize one by one into knowledge that can be reconstructed from basic structures, branch relationships, and transposition rules, with a complete set of diagrams available for reference.

I thank Jens Larsen and the educators who came before us. Their continued sharing of explanations, diagrams, and exercises helps those who later explore these fretboard relationships independently. This book expresses that gratitude through clear credits and sources. The acknowledgment recognizes their contributions to teaching and sharing, without identifying any author of teaching material as the sole inventor of CAGED.

I therefore decided to organize and publish this system as a book: to make numbers an entry point for memory, make the relationships visible, and preserve the meaning of musical knowledge within a new naming structure.

Purpose and earlier precedents

Purpose and attribution

This system aims for an absolutely clear memory framework: stable position, family and branch addresses support memory and lookup, while actual note and chord names verify the sound. Clarity is a design goal, not a promise that every learner will learn faster.

Earlier fretboard teaching

CAGED, movable chord shapes, fretboard scales and arpeggios, numbered frets and tablature all have precedents. This project does not claim to have first discovered those musical ideas or notation elements.

A teaching author is not necessarily the inventor

Wolf Marshall wrote the Guide to C-A-G-E-D published by D'Addario; the chart carries a 2013 copyright date. This is a credit to that material's author. It does not establish a first or sole inventor of CAGED, and this book makes no such assertion.

Numbered frets and chord diagrams

Kristin Bigness's How to Read Tabs (Fender) explains fret numbers and 0 for an open string. Ben Nemeroff's chord-chart guide explains string/fret grids, X/O and left-hand finger numbers 1–4. These existing conventions differ from this book's position addresses and were not invented here.

What this book organizes

Seven teaching families, fixed reference points, branches, α scale and β arpeggio labels, complete fret-by-fret charts and sounding names form one memory and lookup convention. Equivalence to other methods or worldwide originality requires separate research; it cannot be inferred from this book alone.

Memory addresses and musical names

Numbers identify patterns; letters name sounds

Numbers identify the pattern; letters retain the actual musical name. For example, 5-6 is pattern 6 at reference fret 5 and sounds C major. Pattern 6 is introduced through the A shape. The numeric address is intended to reduce the burden of mixing a shape's letter name with the sounding chord's name; C D E F G A B and conventional harmony remain in use.

An example you can check

1-1 is the C-family major shape at reference fret 1 and sounds C major. Move the whole shape four frets: 5-1 sounds E major. The final 1 remains a family address; it does not mean that the actual root must always be C.

What numeric order adds

Reference frets run in order, families run from 1 to 7, and variants extend within a family. This supplies sortable, expandable lookup addresses. Branch suffixes are registry conventions, not intervals, harmonic degrees or pitch heights. Remembering many individual diagrams becomes learning a base structure, reference, branches and transposition rules; 22 positions of one pattern need not be learned as 22 unrelated shapes.

Relationship to CAGED

CAGED's letter order already has structure: five connected shapes show different positions of the same chord. This system explicitly adds reference-fret and registered-family addresses, emphasizing the relationship between names, positions and indexes. The methods can be studied together. Ordered numeric addresses do not by themselves prove faster memorization.

Seven teaching entry points

C1 D2 E3 F4 G5 A6 B7 retain familiar names as entry points. F/E and B/A include geometrically translated counterparts, so seven families do not imply seven unrelated fundamental shapes. Seven-family α/β charts are not automatically standard CAGED or three-notes-per-string fingerings.

The aim is systematic command of the registered material. Reconstructing a pattern from its rules, fretting fluently, changing position and recognizing sounds are complementary but distinct skills.

Number positions, group shapes into families, branch the variants: learn the rules and find the shape by its address.

All seven chord families come first, followed by the seven scale α families and then the seven arpeggio β families. Each category runs C-D-E-F-G-A-B. Within a branch, valid reference positions progress left to right, then top to bottom.

From the name to the sound

Read a complete name first

5-11.1α

5 = reference fret 1 = C family 1.1 = scale branch α = scale

Step 1 · Find the family

C, D, E, F, G, A, B correspond to 1, 2, 3, 4, 5, 6, 7. This number identifies a geometric family; the sounding root can have a different letter name.

Step 2 · Read the category and suffix

No Greek letter means a chord; final α means a scale; final β means an arpeggio. All share a family and reference framework. Scale α suffixes have their own formula table; β suffixes correspond to chord types.

Step 3 · Locate and move the whole pattern

The first number gives the actual fret of the family's reference square. Move every sounding point together. The square remains a coordinate even when it contains no note.

Step 4 · Play for the intended purpose

Chord diagrams indicate notes sounded together. Play α and β one note at a time using the circled route table. Circled 1 to N is play order, not left-hand finger numbering.

Seven families, one reference framework

Parent	Family	Original reference	Original code	Original sound
C	1	String 2, fret 1	1-1	C
D	2	String 3, fret 2	2-2	D
E	3	String 3, fret 1	1-3	E
F	4	String 1, fret 1	1-4	F
G	5	String 5, fret 2	2-5	G
A	6	String 4, fret 2	2-6	A
B	7	String 5, fret 2	2-7	B

Three categories share one family reference

1, 1α and 1β all belong to C; 11, 11α and 11β also use C’s reference. An α/β map may have no note at that square. It is only a coordinate: do not add a note there.

The parent’s letter does not fix the sounding chord

The C-family major parent at 1-1 sounds C. At 5-1 it sounds E. The family is still C, while position and sound change. Parent codes remain 1–7; 10, 20 and similar codes are fifth-dyad branches.

F/E and B/A retain overlapping, transposed registrations. The entry count therefore counts this edition’s named diagrams, not mutually distinct human hand shapes.

The branch tree

Family 1: C shape

$$1 \rightarrow 11 \rightarrow 11.1$$

1 is the major parent; 11 is minor; 11.1 is the minor-sixth branch. Dots extend the tree; they are not decimal fractions.

Scales in the same family

$$1\alpha \rightarrow 11\alpha \rightarrow 11.1\alpha$$

1α is major; 11α is natural minor. Dotted suffixes continue the scale formula tree. Write α at the end of the entire numeric code.

Arpeggios in the same family

$$1\beta \rightarrow 11\beta \rightarrow 11.1\beta$$

1β is a major-triad arpeggio; 11β is minor; 11.1β is minor sixth. The suffix matches the corresponding chord type.

Put the position first

$$5\text{-}1 \rightarrow 5\text{-}11\alpha \rightarrow 5\text{-}12.1\beta$$

The leading 5 gives only the reference fret. It is not part of branch-code arithmetic and does not specify a finger.

The categories share family, reference and reading rules, but a suffix does not always mean the same formula across all three. Use the scale suffix table for α and the shared chord table for β.

Scale α formula suffixes

α suffix	Scale formula	Semitone intervals
none	Major scale (Ionian)	0,2,4,5,7,9,11
0	Harmonic major scale	0,2,4,5,7,8,11
0.1	Double harmonic major scale	0,1,4,5,7,8,11
0.2	Harmonic major — mode 2	0,2,3,5,6,9,10
0.3	Harmonic major — mode 3	0,1,3,4,7,8,10
0.4	Harmonic major — mode 4	0,2,3,6,7,9,11
0.5	Harmonic major — mode 5	0,1,4,5,7,9,10
0.6	Harmonic major — mode 6	0,3,4,6,8,9,11
0.7	Harmonic major — mode 7	0,1,3,5,6,8,9
1	Natural minor scale (Aeolian)	0,2,3,5,7,8,10
1.1	Harmonic minor scale	0,2,3,5,7,8,11
1.1.2	Harmonic minor — mode 2	0,1,3,5,6,9,10
1.1.3	Harmonic minor — mode 3	0,2,4,5,8,9,11
1.1.4	Harmonic minor — mode 4	0,2,3,6,7,9,10
1.1.5	Harmonic minor — mode 5	0,1,4,5,7,8,10
1.1.6	Harmonic minor — mode 6	0,3,4,6,7,9,11
1.1.7	Harmonic minor — mode 7	0,1,3,4,6,8,9
1.2	Melodic minor scale	0,2,3,5,7,9,11
1.2.2	Melodic minor — mode 2	0,1,3,5,7,9,10
1.2.3	Melodic minor — mode 3	0,2,4,6,8,9,11
1.2.4	Melodic minor — mode 4	0,2,4,6,7,9,10
1.2.5	Melodic minor — mode 5	0,2,4,5,7,8,10
1.2.6	Melodic minor — mode 6	0,2,3,5,6,8,10
1.2.7	Melodic minor — mode 7	0,1,3,4,6,8,10
2	Dorian scale	0,2,3,5,7,9,10
3	Phrygian scale	0,1,3,5,7,8,10
4	Lydian scale	0,2,4,6,7,9,11
5	Mixolydian scale	0,2,4,5,7,9,10
6	Locrian scale	0,1,3,5,6,8,10
7	Major pentatonic scale	0,2,4,7,9
7.1	Major blues scale	0,2,3,4,7,9
8	Minor pentatonic scale	0,3,5,7,10
8.1	Minor blues scale	0,3,5,6,7,10
9	Chromatic scale	0,1,2,3,4,5,6,7,8,9,10,11
9.1	Whole-tone scale	0,2,4,6,8,10
9.2	Half-whole diminished scale	0,1,3,4,6,7,9,10
9.3	Whole-half diminished scale	0,2,3,5,6,8,9,11

Example: C family with no suffix is 1α; adding suffix 1 gives 11α. Intervals use root = 0, modulo 12. Modes rotate the parent's step pattern. Melodic minor uses its ascending/jazz form.

Shared chord and β suffixes

Chord/β suffix	Quality	Type
none		Major triad arpeggio
0	5	Power-chord arpeggio
1	m	Minor triad arpeggio
1.1	m6	Minor sixth chord arpeggio
1.2	mMaj7	Minor-major seventh chord arpeggio
1.3	madd9	Minor added-ninth chord arpeggio
1.4	m6/9	Minor sixth/ninth chord arpeggio
2	7	Dominant seventh chord arpeggio
2.1	9	Dominant ninth chord arpeggio
2.2	11	Dominant eleventh chord arpeggio
2.3	13	Dominant thirteenth chord arpeggio
2.4	7b5	Dominant seventh flat-five chord arpeggio
2.5	7#5	Dominant seventh sharp-five chord arpeggio
2.6	7b9	Dominant seventh flat-nine chord arpeggio
2.7	7#9	Dominant seventh sharp-nine chord arpeggio
3	maj7	Major seventh chord arpeggio
3.1	maj9	Major ninth chord arpeggio
3.2	maj13	Major thirteenth chord arpeggio
3.3	maj7#5	Augmented major seventh chord arpeggio
3.4	maj7b5	Major seventh flat-five chord arpeggio
4	m7	Minor seventh chord arpeggio
4.1	m9	Minor ninth chord arpeggio
4.2	m11	Minor eleventh chord arpeggio
4.3	m7b5	Half-diminished seventh chord arpeggio
5	sus4	Suspended-fourth chord arpeggio
5.1	sus2	Suspended-second chord arpeggio
5.2	7sus4	Dominant seventh suspended-fourth chord arpeggio
6	6	Major sixth chord arpeggio
6.1	6/9	Sixth/ninth chord arpeggio
7	add9	Added-ninth chord arpeggio
8	dim	Diminished triad arpeggio
8.1	dim7	Diminished seventh chord arpeggio
9	aug	Augmented triad arpeggio

Suffixes: 0=fifth dyad, 1=m, 2=7, 3=maj7, 4=m7, 5=sus4, 6=6, 7=add9, 8=dim, 9=aug. Parent codes 1–7 are major. Not every family has every chord grip registered; β formulas may be registered first.

The fret-by-fret chromatic cycle

Each fret upward raises the root by one semitone. The complete cycle includes sharps/flats and has twelve positions, as below; it is not simply C D E F G A B.

C +0 semitones	C# +1 semitone	D +2 semitones	D# +3 semitones	E +4 semitones	F +5 semitones
F# +6 semitones	G +7 semitones	G# +8 semitones	A +9 semitones	A# +10 semitones	B +11 semitones

Watch the C parent move one fret at a time

Numeric name	Sounding major chord	Frets above original
1-1	C	0
2-1	C#	1
3-1	D	2
4-1	D#	3
5-1	E	4
6-1	F	5
7-1	F#	6
8-1	G	7
9-1	G#	8
10-1	A	9
11-1	A#	10
12-1	B	11
13-1	C	12

Moving 12 frets returns to the same note name one octave higher. C to D spans two frets; E to F and B to C span one. This semitone structure explains the unequal fret gaps between natural letter names.

Reading diagrams, fingers and play order

Lines, dots and the reference square

Vertical lines run from string 6 to 1, left to right. Numbers at left are actual frets. The orange square is the family reference; teal dots mark roots and dark dots other notes. X means do not play that string. Open strings appear above the nut.

Left-hand fingers use only 1–4

The seven major parent shapes in Part III use suggested fingers: 1 index, 2 middle, 3 ring, 4 little; O is open. A bar indicates the suggested index-finger barre; higher notes still use the other fingers.

Circled 1 to N is play order

Circled numbers may exceed 7. They are neither finger numbers nor numbered scale degrees. The route ascends through distinct actual pitches; it need not start on the tonic (C-family major starts on E). “6/5 A” means string 6, fret 5, A. Teal marks the tonic separately.

All map points and the example route

The diagram retains every target note location in the window. The route selects one location per distinct pitch, so some dots are not used. After learning the position, try tonic-to-tonic routes, alternative strings for the same pitch, descent, groups and rhythms.

Other chord dots show note names

Other chord charts label dots with actual note names. Complex variants do not receive invented 1–4 finger suggestions. Omissions and slash bass notes are calculated from the sound of each position.

Play slowly, then choose the fingers

Scales and arpeggios are sequential: do not press every dot at once. These five-fret windows are algorithmically generated, not standard CAGED or three-notes-per-string fingerings. They are not guaranteed to be the easiest choice for every hand.

The 20-fret and 24-fret limits

This book uses 20-fret and 24-fret neck limits. A reference position is valid only when every sounding point lies from fret 0 to the last fret and the family reference range is respected. Fret 0 means the open string/nut.

Family	Chords 20/24	α 20/24	β 20/24
C 1	1-18/1-22	1-17/1-21	1-18/1-22
D 2	2-19/2-23	2-18/2-22	2-18/2-22
E 3	1-19/1-23	1-17/1-21	1-17/1-21
F 4	1-18/1-22	1-16/1-20	1-16/1-20
G 5	2-19/2-23	2-18/2-22	2-18/2-22
A 6	2-20/2-24	2-18/2-22	2-18/2-22
B 7	2-18/2-22	2-16/2-20	2-16/2-20

Two labels on the fret-by-fret charts

“20/24f” works within both limits. Gold “24f” means the full shape extends beyond fret 20 but stays within 24. Part III lists every valid position for all 651 entries; the final position is calculated using the whole shape.

Every entry, from its first valid position to its last

Part II gives 20/24-fret reference ranges and complete chart-page ranges. Part III prints every integer position in those ranges: 13,701 diagrams, not just parent shapes or endpoint examples. Every full shape stays within 24 frets. Choose high-position options according to your comfort and playing needs.

Using the complete atlas directories

This complete fretboard reference expands 651 entries into 13,701 position diagrams. Directories and charts run through all seven chord families, then scale α families, then arpeggio β families. Click a complete branch row to reach its first valid position.

Family	Chords: entries / page	α: entries / page	β: entries / page
C 1	13 / 16	37 / 23	33 / 30
D 2	12 / 17	37 / 24	33 / 31
E 3	31 / 18	37 / 25	33 / 32
F 4	31 / 19	37 / 26	33 / 33
G 5	12 / 20	37 / 27	33 / 34
A 6	31 / 21	37 / 28	33 / 35
B 7	31 / 22	37 / 29	33 / 36

Every branch has its own continuous page range

The rightmost column lists the complete page range. Each branch starts on a fresh page; positions run left to right, then top to bottom. Branch 10 starts at 1-10, then 2-10, 3-10, and continues to its last valid position within 24 frets.

Sounding names include bass and omitted tones

C7(no5) omits the fifth. Dadd9/E has root D but lowest sounding note E. Scale and arpeggio intervals follow the registry. Diagrams use sharps consistently for enharmonic pitches; strict modal spelling may be added separately.

C family · Chord index

Click a row for the branch's first valid position. The last column gives its complete chart-page range.

Code	Type	Ref. s/f	20f	24f	Pages
1	Major triad · C-shape family	2/1	1-18	1-22	37-38
10	Power chord (fifth dyad) · C-shape family	2/1	1-18	1-22	39-40
11	Minor triad · C-shape family	2/1	1-18	1-22	41-42
12	Dominant seventh chord · C-shape family	2/1	1-18	1-22	43-44
12.1	Dominant ninth chord · C-shape family	2/1	1-18	1-22	45-46
13	Major seventh chord · C-shape family	2/1	1-17	1-21	47-48
14	Minor seventh chord · C-shape family	2/1	1-18	1-22	49-50
15	Suspended-fourth chord · C-shape family	2/1	1-18	1-22	51-52
15.1	Suspended-second chord · C-shape family	2/1	1-18	1-22	53-54
16	Major sixth chord · C-shape family	2/1	1-18	1-22	55-56
17	Added-ninth chord · C-shape family	2/1	1-18	1-22	57-58
18	Diminished triad · C-shape family	2/1	1-18	1-22	59-60
19	Augmented triad · C-shape family	2/1	1-18	1-22	61-62

Do not fret an empty reference square. Only note dots sound. Scales/arpeggios follow the circled route one note at a time; alternative locations for the same pitch are possible.

D family · Chord index

Click a row for the branch's first valid position. The last column gives its complete chart-page range.

Code	Type	Ref. s/f	20f	24f	Pages
2	Major triad · D-shape family	3/2	2-19	2-23	63-64
20	Power chord (fifth dyad) · D-shape family	3/2	2-19	2-23	65-66
21	Minor triad · D-shape family	3/2	2-19	2-23	67-68
22	Dominant seventh chord · D-shape family	3/2	2-20	2-24	69-70
23	Major seventh chord · D-shape family	3/2	2-20	2-24	71-72
24	Minor seventh chord · D-shape family	3/2	2-20	2-24	73-74
25	Suspended-fourth chord · D-shape family	3/2	2-19	2-23	75-76
25.1	Suspended-second chord · D-shape family	3/2	2-19	2-23	77-78
26	Major sixth chord · D-shape family	3/2	2-20	2-24	79-80
27	Added-ninth chord · D-shape family	3/2	2-19	2-23	81-82
28	Diminished triad · D-shape family	3/2	2-19	2-23	83-84
29	Augmented triad · D-shape family	3/2	2-19	2-23	85-86

Do not fret an empty reference square. Only note dots sound. Scales/arpeggios follow the circled route one note at a time; alternative locations for the same pitch are possible.

③ 5/23 G# ⑥ 2/21 G#

Ref. frets: 20f 2-16 24f 2-20

All target notes are mapped. Circled steps ascend through distinct pitches: string/fret note. Steps are not finger numbers.

B family · Arpeggios β 79β

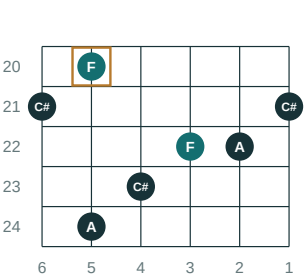
Reference frets 20-20 | Augmented triad arpeggio · B-shape family

Valid reference frets: 20f 2-16 24f 2-20 | Move the whole shape one fret: root rises one semitone.

20-79β

24f

F Augmented triad arpeggio · B-shape family



Play order: circle → string/fret note

① 6/21 C#
② 5/20 F
③ 5/24 A
④ 4/23 C#
⑤ 3/22 F
⑥ 2/22 A
⑦ 1/21 C#

Ref. frets: 20f 2-16 24f 2-20

All target notes are mapped. Circled steps ascend through distinct pitches: string/fret note. Steps are not finger numbers.

A four-week practice plan

Week 1 · Position before speed

Choose one C, E or A parent each day. Move fret by fret from its original position. Say the numeric name, then the sounding chord. Practice three adjacent positions at a time; check that formerly open strings move with the shape.

Week 2 · Semitones and twelve frets

Read twelve chromatic steps in one family and hear the semitone spacing. Compare equal root names twelve frets apart. Practice within 20 frets first, then explore the gold 24-fret extension.

Week 3 · Three categories, one reference

Keep one family and reference fret fixed. Play its major chord, major scale α and major-triad β in turn. Find the shared reference and common notes. Play α/β sequentially using the circled route.

Week 4 · Branches and your own routes

At one position compare major, minor, dominant seventh and matching β patterns, then major α and natural minor α. Choose comfortable left-hand fingers for each route; practice slowly upward, downward and alternating.

Practice a short passage at a time. Increase speed after reading the code, fretting and hearing accurately. If a full parent shape stretches too far, choose a more suitable branch in the website catalog.

Major parent shapes by sounding root

Numbers are all valid reference frets where each major parent reaches the target root. Click a family heading for its complete charts.

Root	C 1	D 2	E 3	F 4	G 5	A 6	B 7
C	1/13	12	9/21	8/20	7/19	5/17	3/15
C#	2/14	13	10/22	9/21	8/20	6/18	4/16
D	3/15	2/14	11/23	10/22	9/21	7/19	5/17
D#	4/16	3/15	12	11	10/22	8/20	6/18
E	5/17	4/16	1/13	12	11/23	9/21	7/19
F	6/18	5/17	2/14	1/13	12	10/22	8/20
F#	7/19	6/18	3/15	2/14	13	11/23	9/21
G	8/20	7/19	4/16	3/15	2/14	12/24	10/22
G#	9/21	8/20	5/17	4/16	3/15	13	11
A	10/22	9/21	6/18	5/17	4/16	2/14	12
A#	11	10/22	7/19	6/18	5/17	3/15	13
B	12	11/23	8/20	7/19	6/18	4/16	2/14

The same C major chord can appear in several families. The table gives reference frets, not a required string for the root. Slash-separated numbers are two valid positions twelve frets apart.

The reference roots of α and β follow their registered families. Choose the type first, then enter its branch through the family directory. Each chart names the actual notes. This table is not a root-position table for every α/β branch.

Family directories by category

Directories run continuously through chords, scales α and arpeggios β; within each category, families run C through B. Every page number below is clickable, leading from category and family to specific branches.

Family	Chord index	Scale α index	Arpeggio β index
C 1	16	23	30
D 2	17	24	31
E 3	18	25	32
F 4	19	26	33
G 5	20	27	34
A 6	21	28	35
B 7	22	29	36

Pages with type rules

Scale α suffixes and semitone formulas 10

Chord/β suffixes and quality symbols 11

Scope of this edition

This edition registers 651 entries: 161 chords, 259 scale-family maps (37 formulas × 7 families), and 231 arpeggio-family maps (33 formulas × 7 families). All valid positions produce 13,701 diagrams across 2,323 pages.

Complete within this edition’s registry

All 651 entries and every valid reference position within 24 frets are printed. This does not exhaust every possible chord name, scale name, human fingering or performance technique.

What has been checked computationally

Standard tuning converts every string/fret point to pitch, and intervals are checked against the formulas. Valid ranges use the whole shape and family reference. Routes remove repeated absolute MIDI pitches and ascend in pitch; the diagrams retain every target location.

What the player chooses

No claim is made that every complex variant or generated five-fret window has been tested by a human player. Choose left-hand fingers, durations, picking order, shifts, slurs and comfortable alternatives for your purpose. Fingerings for the seven major parent shapes are explicitly marked suggestions.

Room for further branches

New useful patterns can be added by family and branch. Keep existing code meanings stable so the same name preserves the same shape and reference rules. More detailed playing actions can be stored as additional information.

Numeric fingering catalog

The website uses the same registry to query family, category, branch, sounding root and reference fret. This book prints every valid position and works offline. The website offers interactive browsing and links from the selected branch and fret to the matching book page.

https://eaden0438-coder.github.io/eaden-guitar-memory/

The website address complements the offline files; continued availability depends on hosting. The unified registry JSON is authoritative for diagrams, formulas, reference ranges and entry sources. References check established theory and learning scope; this project organizes numeric names and window maps.
